

EQS SUV
THIS IS FOR
PIONEERS.

A side-profile advertisement for the Mercedes EQ SUV. The car is a sleek, silver electric SUV shown in profile, facing left. It is positioned on a dark, reflective surface that mirrors the car and the woman. To the right of the car, a woman in a white, belted trench coat stands looking towards the horizon. The background is a vast, flat landscape under a twilight sky, with several large, glowing, golden-yellow rock formations scattered across the scene. The overall mood is futuristic and elegant.

This is for pioneers.

Groundbreaking and unique – the EQS SUV. The first all-electric luxury SUV from Mercedes-EQ with space for up to seven people. First-class comfort, innovative features like the MBUX Hyperscreen, and almost silent driving performance. A pioneer on the road – the EQS SUV combines the elegant driving experience of the EQS Saloon with the spaciousness of an SUV.

Electric mobility in grand style.

A vehicle that sets new standards. Multimedia entertainment for the rear-seat passengers and high-quality materials all the way back to the third seat row. Wherever you sit in the EQS SUV, its comfort and stylish appeal mean that you may almost not want to get out again.

A pioneer on the road.

Spacious and elegant – no longer a contradiction in terms. The new EQS SUV reinvents the SUV idea. An aerodynamically optimised design with an elegantly dynamic silhouette makes for an exceptional appearance as well as ensuring efficient, smooth performance on any road surface.

Anything but ordinary.

Look the future of mobility in the eye. At the front end, the hallmark radiator grille of the Mercedes-EQ family with Mercedes-Benz pattern, together with the DIGITAL LIGHT headlamps, create an unmistakably futuristic look.

The new lightness of size and comfort.

The EQS SUV sets new standards in digital driving comfort. In the cockpit, the MBUX Hyperscreen with zero-layer technology spans the entire width of the dashboard. And highlights such as integrated massage seats and an innovative HEPA air filter system ensure outstanding comfort during the journey.

Welcome to the future of electric mobility.

Elegant and stylish in every detail – the exterior of the EQS SUV boasts an array of exceptional design highlights. Most striking of all are the tail lamps in a 3D helix design, flush-fitting door handles and illuminated running boards.

True greatness comes from within.

Space for life – whether for big families or big shopping sprees, the generous space inside the EQS SUV is variable and versatile. A third seat row is available as an option, creating room for up to seven passengers.

MBUX multimedia system.

First-class entertainment and information – experience exciting entertainment with highlights such as the MBUX multimedia system with MBUX Hyperscreen and zero-layer user interface, the MBUX Augmented Reality Head-up Display and the MBUX Rear Seat Entertainment system. All that remains is to decide whether you would prefer to sit in the first or second row of seats.

Assistance systems.

Intelligent features in your EQS SUV help you make the most of the vehicle's capabilities. Driving assistance systems and a range of drive programs encourage an energy-saving and anticipatory driving style. And efficiency-enhancing recuperation means you get the maximum out of your vehicle.

Our driver assistance and safety systems are merely aids, and do not relieve you of your responsibility as the driver. Please take note of the information in the owner's manual and the system limits which are described therein.

Multicontour seats for driver and front passenger.

Give yourself a treat: these seats combine a wealth of adjustment options with exclusive feel-good extras. Individually inflatable air chambers make it possible to achieve the ideal seating position for you, coupled with intensive lateral support. The soothing massage effects, optionally with comforting warmth, make every journey a pleasure.

Exclusive trim elements.

High-quality, timeless, luxurious – the interior is a master class in aesthetics, featuring exclusive trim elements such as open-pore wood with Mercedes-Benz pattern in aluminium.

Rear axle steering with 10° steering angle adjustment.

See why Mercedes-Benz leads the way when it comes to parking, too – the rear axle steering adjusts the steering angle by up to 10° and significantly reduces the turning circle. Your car handles almost like a compact car during manoeuvring. At higher speeds, on the other hand, you drive with the effortless superiority afforded by the long wheelbase.

Illuminated running boards.

The illuminated running boards make it easier to get into your new EQS SUV. As well as making a visual statement, they are aerodynamically optimised.

Standard equipment.

Powerful SUV design meets style-defining elements from Mercedes-EQ. These include the characteristic Black Panel radiator grille and flush-fitting door handles as well as solid wheel arch linings and 20-inch light-alloy wheels. This way, even with the standard level of equipment, you are able to show your clear sense of luxury and innovation.

Images may show optional extras that are not part of the described equipment lines.

Electric Art Line.

An ingenious take on superior luxury – the Electric Art exterior accentuates your vehicle's design. Large trim elements in chrome and 21-inch light-alloy wheels emphasise the impressive dimensions. With the Electric Art interior, you can feel progressive luxury in every fibre of the interior. Attractive comfort seats with elegant contour lighting invite you to take your place behind the multifunction steering wheel in nappa leather. In addition, the ambient lighting orchestrates an array of atmospheric colour concepts.

AMG Line.

Underline the dynamic side of your vehicle with the expressive styling of the AMG Line. Combine the unmistakable purpose design with the sporty genes of Mercedes-AMG. The AMG Line interior lends your Mercedes a more visible and tangible sense of sportiness. In addition to the progressive aesthetics of the interior, the multifunction sports steering wheel with flattened bottom section and perforated grip area enhances driving pleasure. Sports seats with a dynamic seat upholstery layout give you excellent lateral support.

Night Package.

The Night Package lends even more expression to your vehicle's powerful exterior design. Numerous features are finished in black or black chrome. Depending on the vehicle's paint finish, this creates contrasts or flowing transitions. Whatever you choose, it puts your individual stamp on the vehicle.
